

MOSQUITO FIRE PROTECTION DISTRICT DISTRICT STATUS REPORT

Fire Chief Eddie Dwyer

November 9, 2017

I. The Department.

We submitted our proposal to the JPA for the operation of a half time medic unit. We are in competition with Diamond Springs, and Garden Valley Fire Districts. I believe we submitted a proposal that over the long run would provide the greatest fiscal savings and operational capability to the JPA..

II. The Station:

Paid staff completed an extensive inventory of equipment owned by the Fire District.

We completed a full building inspection in preparation for the upcoming winter. Some repairs to the roof were made, more are to follow quickly. The west side of the building will need to be re-sided and portions of the roof replaced. The Firefighters have appropriate skills and abilities and would like to keep all labor in house. We will identify the cost of material to install a new roof, new siding for the west side of the station and to paint the entire building. The cost will be submitted for the 2018/19 Budget.

III. INFORMATION:

Our annual audit has been completed.

MS75 is providing funding for three sets of turnouts and three helmets.

IV. Equipment:

Paid staff are in the process of preparing the apparatus and equipment for the winter.

U75 Will be receiving new tires and a frontend alignment. Budget Item 404164

WT 75. During daily inspections, a bad valve stem was found and repaired. Budget Item 404164

V. Calls for Service:

We received 10 calls for Service.

Medical:	4
Public Assist:	4
Hazard:	1
Auto Accident	1
